
About the Conversation Workshop

The Conversation Workshop has been designed to help facilitate peer-to-peer interaction for a beginner level and up. The questions are intended to encourage students to ask and answer peer-to-peer questions about their world.

As the students have a question list provided, those students who lack confidence will have the support of pre-written questions, while more advanced students will have a framework which they can change or alter. It is also advised to ask secondary questions as one word answers have limited educational value.

Along with each set of questions there is a notes section where students can record any newly acquired language.
